ご挨拶 Greetings

私たちは、過去数年人類が経験したことのないコロナウィルスの脅威にさらされました。たくさんの方が亡くなりました。慎んでお悔やみ申し上げます。そのために、各国では経済的ダメージが一層深刻になりました。又、内戦に明け暮れている国々多くなり、益々貧困層が増えています。21世紀の最重要課題は、医療、科学が一体となり、将来は日本だけではなく世界の国々の手でトータルシステムを構築し、世界の人々に提供することが、我々の使命と考えます。裕福な人も、貧困の人も「ああ～子供達が、老人達が、全ての人々から、良い人生だった 幸せだなぁー」と言ってもらえるプランを提供したいと考えます。私たちは、副作用の無い医療目指して研究開発を行い、医療に適した教育を行い、全ての世界的な平等な医療を提供したいと思えます。また、人道支援の観点から貧困に喘ぐ人々の医療の無償提供や職場提供も合わせて実施したいと考えます。

代表理事 四元順一
Representative Director Junichi Yoshiki

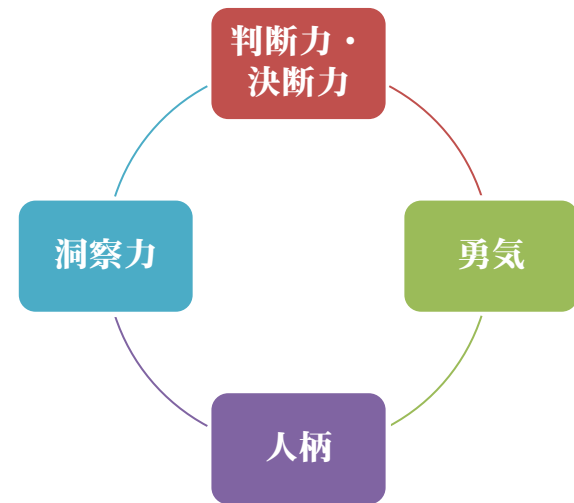

We have been exposed to the threat of the coronavirus that humanity has never experienced in the past few years. A lot of people died. I would like to refrain from doing so. As a reason, economic damage has become even more serious in each country. In addition, the number of countries devoted to the civil war is increasing, and the number of poor people is increasing more and more. We believe that our mission in the 21st century is to build a total system with the hands of countries not only in Japan but also around the world and provide it to people around the world in the future, with medical care and science as one. Both wealthy people and poor people want to offer a plan that will make them say, "Oh, children, old people, it was a good life, I'm happy." We would like to conduct research and development with the aim of medical care without side effects, provide education suitable for medical care, and provide all global equal medical care. In addition, from the perspective of humanitarian assistance, we would like to provide free medical care and workplaces for people in poverty.

法人の心の在り方 The state of the mind of the corporation

私たちは、貧困家庭の救済はもちろん、温暖化対策や後進国の技術援助、水質改善、医薬品開発等幅広くきゅうさいするものである。その心の姿を示すものである。

In addition to relief for poor families, we are also a wide range of people, including global warming countermeasures, technical assistance from underdeveloped countries, water quality improvement, and drug development. It is the one to show the appearance of the mind.

- ・「私心や私欲を捨てる」ことが全ての出発点になる。
- ・ “Abandoning self-heart and self-desire” is the starting point for everything.
- ・「私心や私欲を捨てる」から、正しい判断、決断ができる。
You can make the right decision and make decisions from “abandoning your self-heartedness and self-desire.”.
- ・「私心や私欲を捨てる」から、先を見通す洞察力ができる。
- ・ From “abandoning self-heart and self-desire”, you can have insights that look ahead.
- ・「私心や私欲を捨てる」から、実行する勇氣、度胸が生まれる。
- ・ From “abandoning self-heart and self-desire”, courage and courage to execute are born.
- ・「私心や私欲を捨てる」から、魅力が備わり、人から好かれる。
- ・ Because it “abandons self-heart and self-desire”, it has charm and is liked by people.

Goals of the United Nations World Human Rights Organization UNWHF Japan Association

日本の貧困問題は深刻ですが、とりわけ未来を担う子どもの貧困は解決に向けて取り組むべき問題です。貧困家庭の子どもや保護者に対し、様々な支援が行われていますが、私たちもできることを見つけ行動してみたいかたがたでしょうか。貧困に悩む子どもを支援するNPOへの寄付や子ども食堂のボランティア活動など、貧困に対しできる支援はいくつもあります。しかし、我々は、ただ単に金品の支援ではなく根本的な人間改革、環境改革を世界の皆さんとともに実現することをお約束します。

Japan's poverty problem is serious, but poverty, especially children who will lead the future, is a problem that needs to be addressed to solve this problem. There is a variety of support for children and guardians from poor families, but why don't you find what we can do and act? There are a number of support that can be done to address poverty, such as donations to NPOs to support children suffering from poverty and volunteer activities in children's cafeterias. However, we are committed to bringing together the world to fundamental human and environmental reforms, not just support for money and goods.

日本で貧困率が高い傾向にある地域とは

What are the areas where poverty rates tend to be high in Japan?

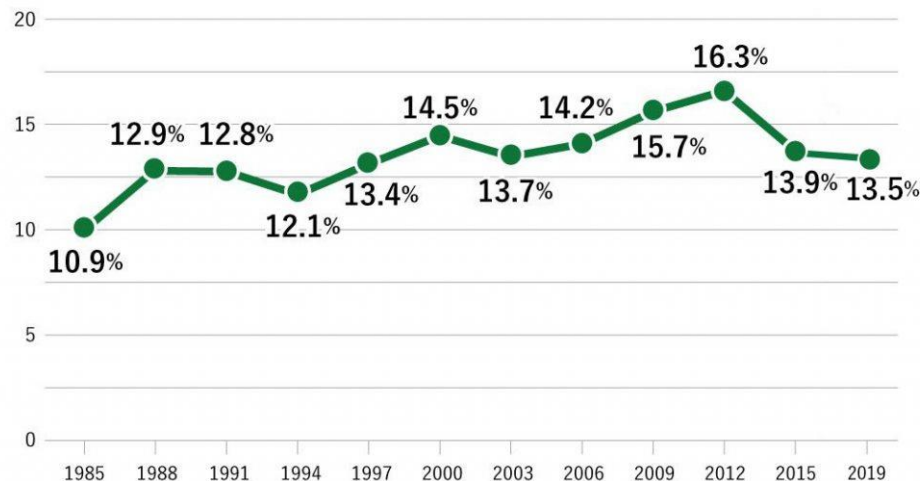

日本における貧困率には都道府県でばらつきがあり、低い地域と高い地域に差があります。その中でも特に高い貧困率となっているのが沖縄県、高知県、鹿児島県、徳島県の4県です。その地域の特性や置かれている環境などが貧困率を高めているという背景が見られますが、共通項などもあり貧困率が高い要因としても注目されています。

Poverty rates in Japan vary among prefectures, and there is a difference between low and high regions. Among them, the four prefectures with a high poverty rate are Okinawa Prefecture, Kochi Prefecture, Kagoshima Prefecture, and Tokushima Prefecture. There is a background that the poverty rate is increasing due to the characteristics of the region and the environment in which it is located, but it is attracting attention as a factor in the high poverty rate due to commonalities.

「子どもの貧困」の現状 The Current State of Child Poverty

日本の子どもの貧困率は今、OECD加盟国の中で最悪の水準にあります。子どもの貧困率は、1980年代から上昇傾向にあり、今日では実に7人に1人の子どもが貧困状態にあるとされています。子どもの貧困率とは、相対的貧困の状態にある18歳未満の子どもの割合を指します。国民を可処分所得の順に並べ、その真ん中の人を半分以下しか所得がない状態を相対的貧困と呼び、親子2人世帯の場合は月額およそ14万円以下（公的給付含む）の所得しかないこととなります。こうした世帯で育つ子どもは、医療や食事、学習、進学などの面で極めて不利な状況に置かれ、将来も貧困から抜け出せない傾向があることが明らかになりつつあります。子どもの貧困問題への対応は喫緊の課題となっています。

Japan's child poverty rate is now at the worst level among OECD member countries. The child poverty rate has been on the rise since the 1980s, and today it is said that one in seven children is in poverty. The child poverty rate refers to the percentage of children under the age of 18 who are in a state of relative poverty. The state in which the people are arranged in the order of disposable income, and the state in which less than half of the person in the middle has income is called relative poverty, and in the case of a two-child household, there is only income of about 140,000 yen or less per month (including public benefits). It is becoming clear that children who grow up in these households are extremely disadvantaged in terms of medical care, meals, learning, and going on to higher education, and tend to be unable to get out of poverty in the future. Addressing the issue of child poverty has become an urgent issue.

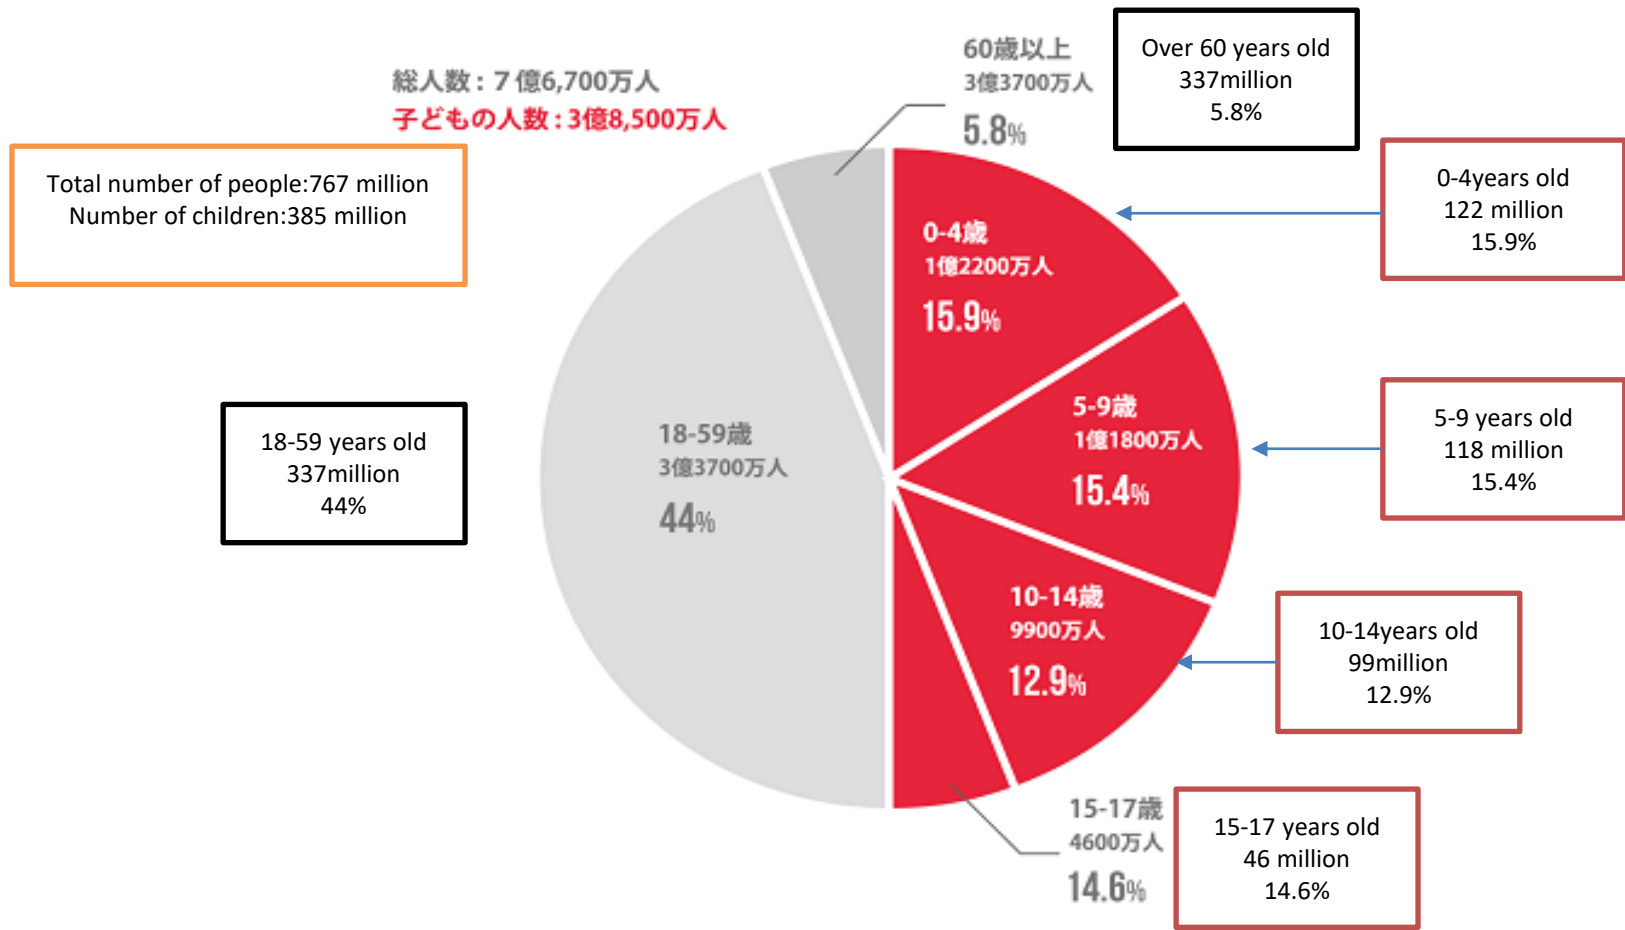

貧困問題とは?現状と原因、解決のためにできること

What is the poverty problem? Current situation, cause, what you can do to solve

メディアでよく取り上げられているSDGs(持続可能な開発目標)。SDGsの17の目標のなかの1つ目に挙げられているのが、「貧困をなくそう」というものです。「貧困」という言葉自体を耳にすることは多いと思いますが、貧困が起こる原因は何なのか、また貧困によってどんな問題が起こるのか、といったことについては、イメージが付きにくい方もいらっしゃると思います。そこで、今回は貧困問題の現状や原因、そして解決するために私たちにできることについて書きたいと思います。

The Sustainable Development Goals (SDGs) are often covered in the media. One of the 17 sdgs goals is to eliminate poverty. I think that the word "poverty" is often heard, but I think that there are people who do not have an image about what causes poverty and what problems occur with poverty. So this time, I would like to write about the current situation and causes of poverty, and what we can do to solve it.

貧困問題の現状 The Current State of Poverty

現在、世界中で7億6700万人、つまり10人に1人が極度の貧困状態(一日当たり1.9ドル以下で生活している人)にあると言われています。しかも、そのうちの約半数、3億8500万人が子どもであり、世界中の子供たちの5人に1人がそういった状況に置かれています。

It is said that 767 million people worldwide, or one in 10, are in extreme poverty (those living on less than \$1.9 per day). And about half of them are children, and one in five children around the world is in that situation.
